Consider the wall thickness including the final covering

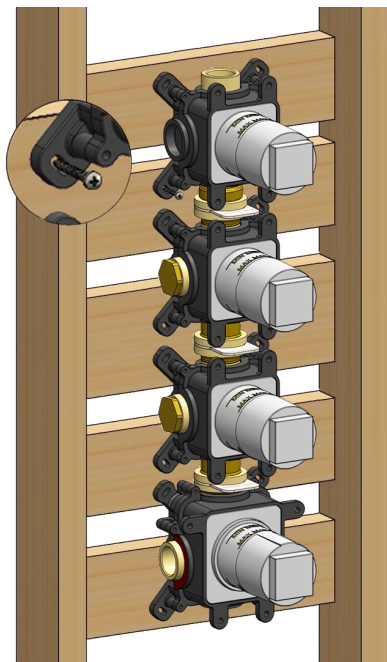

Use a level to find the correct position

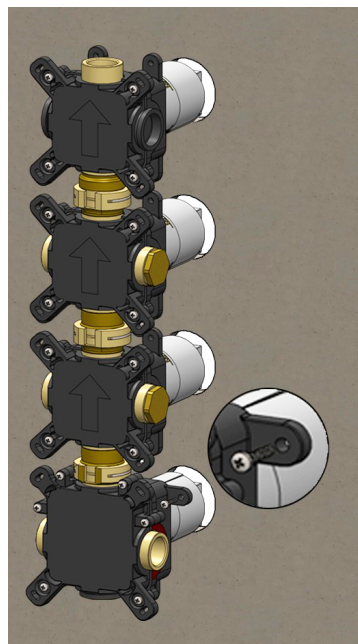

For **in-wall installation**, drill the wall and use plugs and screws to fix the box to the wall

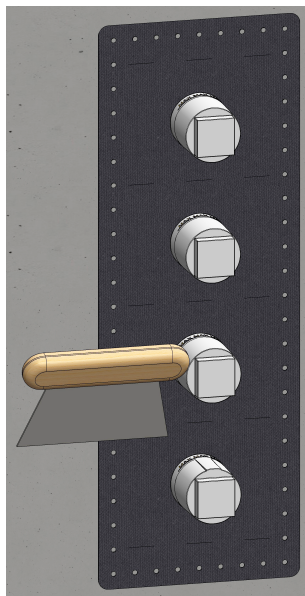

For **frame installation**, use the screws to fix the box to the wood panels

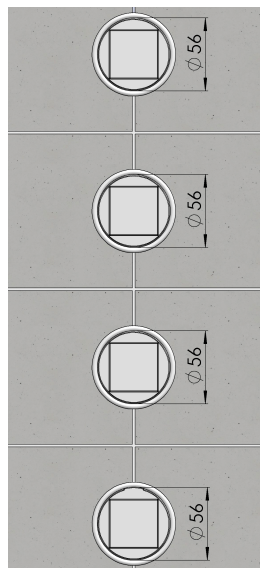

For **plasterboard**, use the screws to fix the box to the drywall

Before tiling fix the membrane to the wall using glue

Drill a 56 mm on the wall covering to allow the cutting of the plastic protections and to ease future maintenance
